

*Before and After: THE RESTORED TRAM SHELTER*

We are delighted to include in the Newsletter these two photographs, taken by John Owen, of the tram shelter at the junction of Folkestone Road and Elms Vale Road, before and after restoration. The Society supported the plea of residents in the Elms Vale district for the refurbishment of the shelter. Dover District Council employed the local specialist firm of Anthony Reed Designs to restore the shelter. The work was finished in June and took six weeks to complete.
